

Seymour Arm Community Update

BC Hydro Remote Community Electrification Program

April

Work Completed & What's Next

In collaboration with the Seymour Arm Community Association (SACA) and the Columbia Shuswap Regional District (CSRD), BC Hydro is preparing a Community Electricity Plan for Seymour Arm.

What is a Community Electricity Plan?

- Identifies community goals and values with respect to electricity
- Recommends the best electricity option for the community

What activities have been completed to date?

- Refine the electricity supply options cost/benefit analyses
- Refine the cost analysis for the community's contribution

What's Next

- Refine the electricity supply options cost/benefit analyses
- Refine the cost analysis for the community's contribution
- Recommend the best electricity supply option
- Provide SACA with the estimated cost to construct a distribution system within Seymour Arm to BC Hydro standards
- Provide an update with local First Nations
- Schedule a community meeting to provide an update and what's next
